

Topic:	Dog on school site		People at Risk:	Pupils, staff, visitors	
Assessment carried out by:	C.Pettman		Staff, pupils and any visitor attending the school.	Date of Review: December 2019 April 2020 May 2020	

Introduction:

The value of pet ‘therapy’ is widely accepted as a powerful aid to stimulation and communication. Studies have shown that the presence of companion animals can improve the well-being of children and lower the rate of anxiety, simply by making the environment happier, more enjoyable and less forbidding.

The rationale behind this decision:

- For the school to have a pet that was able to live as naturally as conditions would allow.
- For the animal to be properly cared for outside of the school day.
- To have a pet that the children could interact with and also be of benefit to the children’s social and emotional development.
- It is accepted that interacting with animals is not appropriate for all children but for some it has the potential to provide many positive benefits.
- Any parent who does not want their child to interact with ‘Monty’ is invited to write to Miss Child’s and inform her of their wishes.
- There are no diseases associated with the puppy as her vet will be responsible for vaccinations, including rabies and completing regular health checks and necessary treatment. A copy of Monty’s health records will be updated and kept in school.
- Monty will also be insured.

The risk assessment below is a working document and will be checked annually by key staff and the governing body.
